Dear David,

Thanks for your email. It was great to read about your visit to Turkey. You asked me to tell you about my last holiday. Well, I spent my holiday in Barcelona in Spain with my uncle who is working there. I went there last June and stayed for one month.

I had a lot of fun with my three cousins. We spent a nice time swimming in the warm sea and playing football on the beach. At weekends, my uncle took us to visit famous places in the city. We saw many beautiful old buildings and we visited the Salvador Dali museum. Also , we went to Barcelona zoo, but the most interesting place for me was the water park where I saw many dolphins.

During that month, I started learning the Spanish language. At first, it was difficult , but then I could understand and speak some words when I went to restaurants and shops. I didn't do much shopping because things were expensive there. I Just bought a handmade scarf for my mother and a pair of shoes for my father.

Well, that's all for now. I will send you some photos very soon. You can't imagine how many photos I took ! I am looking forward to hearing from you soon.

Best wishes,

Ali

Listening 2 :

Mammoths were very large animals that looked like today's Asian elephants. Mammoths lived in cold places during the last Ice Age in Africa, Europe, Asia and North America, but they were not found in Australia and South America. They lived for about 80 years.

Mammnoths were about 4 metres tall, and they weighed about 12 tones. Their bodies were covered with thick long brown hair to keep them warm. Also, Mammoths had long curved tusks. Their tusks were much longer than elephants' tusks. They used their tusks for fighting other animals. Also, they used them as a tool to dig food out of snow. Mammoths ate leaves, grass and other small plants, but they didn't eat meat. They ate about 300 kgs of grass and leaves each day.

Today, there are no more mammoths alive on Earth. They all died more than 11,000 years ago because of two reasons. First, people hunted them for their meat and tusks, Second, Mammoths couldn't live in a very badly changing weather. When the weather became warm, the ice melted, and so many of those mammoths drowned in rivers.
